

My name is Dominic Roberts. I am in the 4th grade at Fort Howard Elementary. I think reading is important because for some kids it's all they got. However, some don't have books at home which is why I feel lucky. My favorite book series is Harry Potter which began my love for reading when I was young. When I started reading Harry Potter I was about 7 years old and it is one of my mom's favorite series. I thought the magic was cool and it helped keep me interested. I've read almost all of the books and I can't wait to finish number 6.

Some kids go home and have nothing to read because they can't afford books. This is why it is important to donate to causes like Give-a-Kid-a-Book. By having books at home, kids have more options for things to do aside from watching TV. And although I really enjoy watching TV or playing video games, reading books at home gives me more confidence and knowledge that helps me everyday. And that is a feeling I hope every kid gets.

That confidence and knowledge is something I hope that helps me in the future become president. And if I ever do become president, I'm gonna make sure every kid gets a bunch of books to have at home!
